Profile

Front End Web Developer with near 4 years of commercial experience in software development mostly using Angular Framework. Familiarized with cross-browser and cross-device responsive web development. Result-orientated, responsible and attention to details. During this time I had the opportunities to work with several types of projects:

Healthcare - platform healthier working environment.

Internet 3D market - creating Iframe external plugin with 3D

Internet of Things - platform of manage light in building

E-commerce - platform of booking

Creating mobile apps with Angular/Ionic and Flutter.

Also had experience as mentor, reviewer of code or lead of front-end team on the project, creating architecture of project and project structure from scratch.
